Education

Boston University

Boston, MA

B.S. in Computer Science, Minor in Business Administration

Expected: May 2023-2027

- Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Software Engineering, Databases Systems, Distributed Systems, Macroeconomics, Microeconomics.

Experience

Product Management Intern

Boston, MA

Redhat

May 2026-August 2026

- Incoming product management on the AI Platforms Team

Software Engineer Intern

London, UK

Synkka AI

February 2026-April 2026

- Built a role-based access system with custom roles, securing over 13 organizations.
- Introduced a user onboard feature eliminating manual setup for all future users.
- Modeled company growth data and monthly projections to support scaling decisions.

Software Engineer Intern

June 2025-August 2025

Staples Inc.

Framingham, MA

- Eliminated 50+ security vulnerabilities and ensured payment security compliance (PCI SSC).
- Built automated API tests integrated into CI/CD, cutting ~3 story points of QA effort per sprint.
- Partnered with product and QA to prioritize bugs and features on Java Spring Boot microservices.
- Contributed across the full SDLC with a focus on e-commerce payment systems.

Artificial Intelligence Engineer Intern

June 2024-August 2024

GIDR.ai

Rochester, NY

- LLM evaluation and prompt engineering, optimizing cost, tokenization, and output quality.
- Designed four self-correcting LLM evaluators measuring accuracy, groundedness, and latency.
- Researched and refined all production prompts to improve reliability and performance.

Projects

HackHarvard (Hackathon)

Cambridge, MA

- End-to-end physical therapy web application with front end, authentication, and backend API
- Live pose estimation, real time accuracy scores for prescribed exercises in real time.

Taste Map

London, MA

- Full stack web app that transforms raw music preferences into structured similarity graphs with weighted tagging, normalization, and clustering model for personal data visualization
- 3D interactive taste map for intuitive exploration of music relationships contrived through spatial grouping, cosine similarity, and real time data

Skills, Interests, etc

AI: Agentic AI, Prompt Engineering, vectordatabase, Openclaw, Langchain,

Languages: Python, GoLang, Java, C, Assembly, JavaScript, SQL, noSQL, HTML, CSS

Related: Linux, Git, Azure, GCS, Agile, Springboot, Maven, Jenkins, Swagger, Postman, Jira

Skills: Communication, Task management, Information security, Problem-solving, Team building
